CH Issue 1

VEP and VES Turflow Heat Exchangers

Description

The Turflow heat exchanger range is a shell & tube design consisting of straight corrugated tubes within a shell. The tubes are secured at either end of the shell by fixed tube sheets. The corrugated tube design promotes increased turbulent flow conditions to provide the Turflow's high heat transfer efficiency. The shell incorporates a bellows type expansion joint that ensures thermal stress does not damage the heat exchanger. The shell is also fitted with drain and vent connections. The heat exchanger is a gasket free design constructed wholly from stainless steel. Normally the heated fluid will flow through the tubes and the heating medium will be in the shell; both countercurrent and concurrent flow paths can be accommodated, inclusive of horizontal or vertical installation.

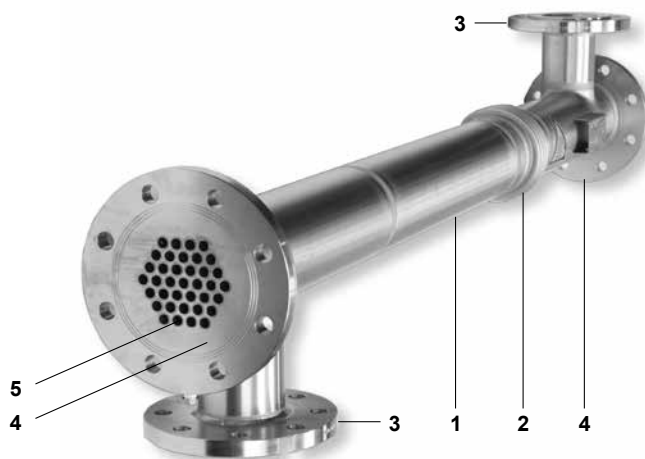

Standards

Turflow type heat exchangers fully comply with the requirements of the European Pressure Equipment Directive 97/23/EC and carry the CE mark when so required. All units are supplied with a Declaration of Conformity.

Certification

A manufacturer's Hydraulic Test Report and Material Certification documentation is available on request.

Note: All certification/ inspection requirements must be stated at the time of order placement.

Pressure / temperature limits

PMA	Shell /Tube side	-10°C to 200°C	12 bar g
		200°C to 300°C	6 bar g
		This option is to be specified at the time of order placement.	
TMA	Shell /Tube side	12 bar g	-10°C to 200°C
		6 bar g	200°C to 300°C
		This option is to be specified at the time of order placement.	
Maximum cold hydraulic test pressure of:			18 bar g for both shell and tube sides

Turflow type heat exchangers

The **VEP** design is fitted with small diameter tubes

The **VES** design is fitted with large diameter tubes

Please contact Spirax Sarco for advice regarding selection –
The most suitable unit will be selected by Spirax Sarco and will be specific for the given application.

Materials

No.	Part	Material	
1	Shell	Stainless steel	ASTM A312 – TP304
2	Expansion joint	Stainless steel	ASTM A240 – TP321
3	Shell side flanges	Stainless steel	ASTM A182 F304
4	Tube sheets / tube side flanges (Different options available according to the specific model)	SX	Stainless steel 316 ASTM A182 F316
		SS	Stainless steel 304 ASTM A182 F304
5	Corrugated tubes (Different options available according to the specific model)	Stainless steel	ASTM A249-TP316L
		Stainless steel	ASTM A249-TP304

Sizes and end connections

Type	Shell length (metres)	Shell Ø	Connections
VEP	0.6, 1, 1.5 and 2 *	1½", 2", 3" 4", 5", 6", 8" and 10"	Flanged EN 1092 PN16 or ASME B16.5 Class 150
VES	1, 2 and 3	2", 3" 4", 5", 6", 8" and 10"	Flanged EN 1092 PN16 or ASME B16.5 Class 150

* **Note** 0.6 and 1.5 shell lengths are not available for shell diameters 5" to 10".

First for Steam Solutions

Table notes:

- Dimension tolerance according to UNI 6100 and TEMA:
B = ±3 mm,
D = ±3 mm,
Flange rotation = ±1°,
Connection alignment = ±1.5 mm.
- Flange sizes according to EN 1092-1 rating PN16, optional equivalent diameter according to ASME B16.5 rating 150 lb.
- PED categorisation assuming a 'not dangerous fluid', Group 2 according to the classification as per the European Pressure Equipment Directive 97/23/CE.

Product nomenclature

Turflow type	VEP	= Small diameter tubes	VES
	VES	= Large diameter tubes	
Shell diameter	1½", 2", 3", 4", 5", 6", 8", 10"	= VEP range in inches	2"
	2", 3", 4", 5", 6", 8", 10"	= VES range in inches	
Tube and tube sheet material	SS	= Stainless steel 304	SX
	SX	= Stainless steel 316L	
Tube length	0.6, 1, 1.5, 2	= VEP range in metres	3
	1, 2, 3	= VES range in metres	
Connection type	F	= EN flange	F
	FA	= ASME flange	
Shell design pressure	V	= 12 bar	V
Tube to tube sheet coupling	Blank	= Expanding	S
	S	= Welding	
PED category	Blank	= CE marking not supplied	CI
	CI	= Category I	
	CII	= Category II	
	CIII	= Category III
