Free discharge capacity For air at 16°C

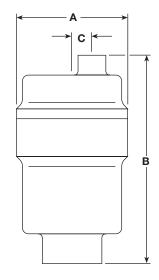

If the temperature of the air differs from 16°C, the discharge capacity from the graph can be corrected by miltiplying it by the following equation:

273 + T (T is the actual temperature in °C)

It may be assumed that the temperature of the air is equal to the temperature of the water.

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions (IM-P017-03) supplied with the product.

Installation note:

The automatic air eliminator/air vent should be installed vertically with the inlet at the bottom. We recommend piping the discharge from the air eliminator/air vent to a suitable drain point.

How to order

Example: 1 off Spirax Sarco ½" AE36A automatic air eliminator/air vent with check valve having screwed BSP connections.

Spare partsThe spare parts available are shown in solid outline. Parts drawn in broken line are not supplied as spares.

Available spares

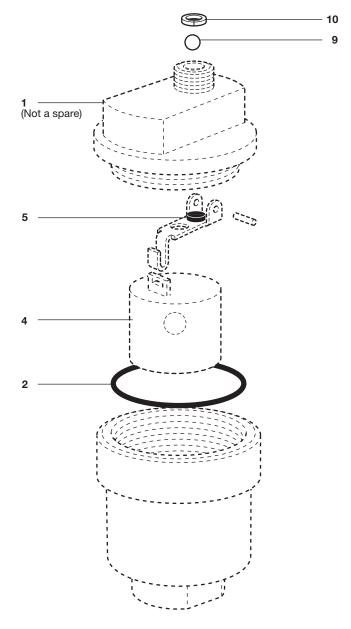

Maintenance kit comprising: 2, 4, 5, 9, 10 Valve cone, float, cap 'O' ring, check valve ball and check valve circlip

If you have earlier versions of the AE36 designated AE36CV which operate over the range 3 - 8 bar then the spares set for the AE36A can not be used. The earlier spares set should be used.

How to order spares

Always order spares by using the description given in the column headed 'Available spares' and state the size and type of automatic air eliminator/air vent.
